“On certain periodic characteristic functions”

by

Eugene Lukacs

The results obtained are somewhat carelessly stated. It can easily be verified that they are correct provided that the following changes are made:

- 1) The words “which has the origin as a lattice point” should be added to theorem 1, theorem 2 and lemma 1.
- 2) The words “with a period parallelogram contained in the interior of its strip of regularity” should be added to the corollary to theorem 1.
- 3) Line 2 in theorem 1 should read “valued and simply periodic . . .” instead of “valued and periodic . . .”. The words “if, and” in line 2 of theorem 2 should be deleted.
