## Preface

The fascicule 3 of volume 33 is the fruit of the conference on Iwasawa theory, held from June 24th to June 28th, 2019, in the University of Bordeaux. This was the eighth conference in the series, following conferences in Besançon (2004), Limoges (2006), Irsee (2008), Toronto (2010), Heidelberg (2012), London (2015) and Tokyo (2017). The Iwasawa 2019 conference was organized by Denis Benoist and Pierre Parent with a scientific committee formed by Denis Benoist, Henri Darmon, Ming-Lun Hsieh, Masato Kurihara, Otmar Venjakob and Sarah Zerbes. It was preceded by four preparatory mini-courses and brought together nearly 150 researchers and PhD students.

The papers published in this fascicule were submitted after the conference. Some contributions are survey articles, while others are original research articles. We wish to express our gratitude to the speakers and all participants for ensuring the success of the meeting and to the contributors for making this publication possible. We are very grateful to the referees for their careful work. Finally, we would like to thank Karine Lecuona, Cathy Métivier, Ida Sirben and Catherine Vrit for their support in organizing the conference.

*Acknowledgements.* The Iwasawa 2019 conference was supported by Horizon 2020 program, Erasmus Mundus ALGANT program, CNRS, ANR-FNR grant ANR-18-CE40-0029 “Galois representations, automorphic forms and their  $L$ -functions”, Foundation Compositio Mathematica, the Number Theory foundation, Journal de Théorie des Nombres de Bordeaux and the University of Bordeaux.

Bordeaux, October 2021

Denis Benoist  
Pierre Parent
