

PUBLISHER'S NOTE

ANNE RUIMY*
Senior Publisher

From 2019 onwards, the journal ESAIM: Control, Optimisation and Calculus of Variations moves to a purely electronic version (stopping printed versions), with one single volume each year.

Due to the growing success of the journal, the number of yearly published pages has been increased to 1800. The number of published articles has increased to 80.

As soon as a given paper has been accepted and has completed the production process, it will be published directly in the ongoing open volume and the authors will immediately receive publication details (volume, year, article number), thus bypassing the intermediary step of being published first in the “E-First” section. Articles can also be more rapidly indexed in abstracting and indexing databases.

EDP Sciences, PA de Courtabœuf BP 112, Les Ulis Cedex A, France.
